What this course is about?

Giving you some positive foundations and tools for energy work, that can be applied to any pathway or discipline.

Opening your eyes to;

- help you think and question
- view each pathway on it's merits
- pick the eyes out of all teachings to add to your bag of tricks
- help you make informed choices

Why

Ever though that before I dive into a pathway as light worker, healer, medium etc

- What is the bigger picture
- What is it all about
- How does it work
- How do I know
- What are the traps

Have you ever chosen a pathway, discipline or religion that tells you;

- what to think
- what you can and cant do
- when you can do it
- to Snub all other pathways.
- ??????????

Ever thought that;

- I'm blindly doing what I'm told.
- What I'm being taught has been altered for purposes of \$\$, power or control.
- Realised that once your ego kicks in you defend your current position and lose the ability to learn and improve.

It is never too late to step back and view what you are doing from a fresh perspective!
